ABOUT ME:

A young and passionate programmer. I graduated in Commerce in the University of Valladolid in 2022. During my university years, I came to a conclusion that my true passion was programming, so after graduating, I started a college degree in Multiplatform App Development. In 2024 I graduated as the best student of my class with a honorific mention in my final project.

I consider myself a proactive, persistent and an autonomous person. I am truly motivated about starting my career and growing as a programmer
