

ABOUT ME:

I am a young software developer, passionate for technology and problem solving through code. During my Commerce Degree I discovered my true passion - programming, which took me to study Multiplatform Application Development. I finished the degree with honorable mention on my final project and as the best student of my promotion.

I have experience in backend development with Java and Spring Boot, and web development with Python and Django. My goal is to keep growing and apply all my knowledge and skills to create efficient and innovative solutions. I love working in teams and take on new challenges, so I can keep growing as a developer

CERTIFICATES:

- edX Verified Certificate for CS50's Introduction to Computer Science - Harvard University.
- edX Verified Certificate for CS50's Web Programming with Python and JavaScript - Harvard University.
- CS50's Introduction to Artificial Intelligence with Python - Harvard University.
- CS50's Introduction to Databases with SQL - Harvard University.
